

New York State Radiological Emergency Preparedness Program

Resources

- » The Indian Point [Emergency Planning FAQ](#) answers some frequently asked questions about State and local planning efforts regarding the Indian Point Energy Center and radiological emergency preparedness.
- » The Indian Point [Radiological Information fact sheet](#) provides information on how emergencies are classified at nuclear power plants, and two glossaries: emergency planning terms and radiological definitions.
- » The [New York State Radiological Emergency Preparedness Plan](#) is designed to minimize the health risk of the State's residents in a radiological emergency such as an accident at a nuclear power plant that may result in a release of radiation.
- » The New York State Department of Health web page on [Radiation and Health](#) provides detailed information about radiation and health effects, and links to U.S. and international radiation councils and research organizations.
- » The New York State Department of Health web page on [Potassium Iodide \(KI\)](#) provides information about KI usage in radiological emergencies.
- » The [Evacuating Yourself and Your Family](#) web page at ready.gov provide information to help individuals prepare for emergencies, including a release of radiation at a nuclear facility.
- » The 10-mile Emergency Planning Zone includes four counties in the Hudson Valley: Putnam and Westchester counties on the east side of the Hudson River, and Orange and Rockland counties on the west side of the Hudson River.
